Re: Municipal Election - Ward 1 Advance Polls

The Long Point Ratepayers' Association has reviewed the locations posted for advance voting and are aware that eligible voters can vote at any of the advance locations regardless of the location of their property.

The Long Point and Turkey Point communities have a high concentration of Resort Residential properties and we hope to make voting as convenient as possible for those that will need to travel to Norfolk county specifically to vote.

The County should make every effort to give all potential voters a reasonable opportunity to participate in the election. Having only one day of advanced polling on a Thursday will unfortunately exclude many potential voters. Also, these seasonal residence, cottage owners will have voting obligations in their home communities.

After discussion with several of our members it is our view that if the St. Williams advance voting station was changed from Thursday Oct 4th to Saturday Oct 6th it would be most convenient for these owners.

We recognize that a change at this time may not be easy however your consideration would be appreciated.

Karen Deans, President
Long Point Ratepayers' Association
